

Giuliana Di Rocco

Junior Full Stack Developer | React · Node.js · TypeScript

giulianadiroccodev@gmail.com | linkedin.com/in/giulianadirocco | github.com/giuliannadr | dev.giulianadirocco.com | +54 11 2834-1223

PROFESSIONAL PROFILE

Full Stack Developer specializing in React, Node.js and TypeScript, with end-to-end delivery experience: architecture, frontend, backend, REST API integration, testing and production deployment via CI/CD with GitHub Actions, Docker and Vercel. Advanced student of Web Development at Universidad Nacional de La Matanza (18/20 subjects completed, GPA 8.72/10, graduating 2025). I work under Scrum methodology applying SOLID principles, Clean Architecture and Clean Code as standard practice. Experienced in code reviews, technical documentation and team communication. English B2/C1 for technical environments and international teams.

TECHNICAL SKILLS

Languages & Backend: Node.js, TypeScript, JavaScript ES6+, C# .NET 9, Java Spring Boot, Java Spring MVC, PHP, Python

Frontend & Web: React, Angular, HTML5, CSS3, Bootstrap, WebSockets, Razor, Thymeleaf

Databases: PostgreSQL, MySQL, SQL Server, MongoDB, Prisma ORM, Entity Framework Core, Sequelize, Hibernate

DevOps & Tools: Git, GitHub, GitHub Actions, Docker, Vercel, CI/CD, REST APIs, Postman, Scrum, Agile

Quality & Architecture: SOLID, Clean Architecture, Clean Code, Design Patterns, Microservices, JUnit, TDD, RBAC, JWT

Languages: Spanish (native), English B2/C1 (technical environments, international teams), Portuguese (basic)

FEATURED PROJECTS

Enterprise Inventory Hub [Node.js, Angular, TypeScript, PostgreSQL, REST API, JWT, RBAC]

Full stack e-commerce platform with role-based access control (RBAC), multi-role admin panel and scalable REST APIs. Layered architecture (controller, service, repository), JWT authentication and relational persistence with Sequelize on PostgreSQL.

AI Semantic Engine [.NET 9, C#, NLP, Entity Framework Core, Clean Architecture, xUnit]

Automated exam evaluation system with natural language processing (NLP) for semantic analysis of open-ended answers. Built on Clean Architecture with dependency injection, unit testing with xUnit and automated PDF report generation.

Distributed Trivia Engine [Java, Spring MVC, WebSockets, Hibernate, MySQL]

Real-time multiplayer platform with WebSocket session synchronization, concurrency management, user authentication and game state persistence with Hibernate.

EXPERIENCE

Full Stack Web Developer | Freelance

January 2025 - Present

- End-to-end development of e-commerce platforms and web systems with React, Node.js and TypeScript: from architecture definition to production deployment.
- Integrated third-party REST APIs and payment gateways; optimized performance on Vercel through compression and cache configuration, achieving 30% faster load times.
- Applied GitFlow and CI/CD with GitHub Actions; conducted code reviews and documented APIs following REST standards to ensure quality across multi-module projects.
- Managed scope changes with clients using agile methodology and delivered features iteratively under an informal Scrum framework.

Technical Tutor — Web Development | Private / UNLaM

2024 - Present

- Designed personalized learning plans covering algorithms, data structures, JavaScript, React, Node.js and relational database design for undergraduate students.
- Conducted systematic code reviews with detailed feedback on Clean Code, Git version control and software development best practices.
- Developed strong technical communication skills — translating complex concepts into clear, actionable guidance directly transferable to collaborative team environments.

EDUCATION

Web Development Degree | Universidad Nacional de La Matanza (UNLaM) | Argentina

2024 - Present

In progress, expected graduation 2025. 18 of 20 subjects completed. GPA: **8.72 / 10**

Key subjects: Algorithms and Data Structures, Object-Oriented Programming, Relational Databases, Software Engineering, Computer Networks, Web Development.
