## FEATURED PROJECTS

### Repostory - Generative AI SaaS (in progress)

*FastAPI, Python, Groq API, llama-3.3-70b, Next.js, REST APIs*

SaaS in active development that analyzes GitHub repositories with Generative AI. Pipeline with Groq API and advanced prompt engineering. FastAPI backend with authenticated REST endpoints, modular architecture and horizontal scalability.

### Aura DJ Management System (in progress)

*Next.js 15, Turborepo, TypeScript, Supabase, Drizzle ORM, PostgreSQL*

Multi-app platform in a Turborepo monorepo: 3 Next.js 15 apps, granular role system and event-driven booking flow with unique tokens. Drizzle ORM over Supabase with RLS. In active development with a real client.

## EXPERIENCE

### Full-Stack Web Developer - Freelance | Dec 2025 - Present

*Buenos Aires, Argentina (remote)*

- Built e-commerce platforms and web systems end-to-end with React, Next.js, TypeScript and Node.js, from architecture to production deployment on Vercel.
- Production monitoring and observability: log analysis and error tracking, achieving 30% improvements in response times.
- Integrated Generative AI tools (Groq API, Claude, Antigravity) for automated code and documentation generation.
- GitFlow and CI/CD with GitHub Actions; code reviews and API documentation under Scrum.

### Technical Mentor in Web Development - Private / UNLaM | Aug 2024 - Present

*Buenos Aires, Argentina*

- Designed personalized learning paths in algorithms, JavaScript, Java, React, Node.js and relational database design for university students.
- Systematic code reviews on Clean Code and best practices, guiding students to production-level skills.
