PROFESSIONAL PROFILE

Full Stack Developer about to graduate from the Web Development degree at UNLaM (Argentina), with 18 of 20 subjects passed with distinction and a GPA of 8.72. Currently working as a freelance developer with React, Next.js, Node.js and TypeScript. My academic training prepared me to work with any stack on the go: I integrated Angular, Java Spring and .NET into real projects. I specialize in learning new technologies fast and applying them well. I have experience in university technical mentoring and English B2/C1. Graduating: July 2026.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript ES6+, Java 1.8+, C# .NET 9, PHP, Python
Frontend	Angular 21, Angular Signals, React 18/19, Next.js 15, Lit Element, Tailwind CSS v4, Framer Motion, Zustand, react-i18next, Vite, PWA, Barcode API
Backend	Node.js, ASP.NET Core (.NET 9), Java Spring Boot, Spring Framework 4+, Spring MVC, Supabase, WebRTC, REST APIs, Vercel Functions
Security	JWT, OAuth 2.0, RBAC, Supabase RLS, Bearer Tokens
Databases	PostgreSQL, MySQL, SQL Server, MongoDB, Firebase Firestore — Prisma, Sequelize, Hibernate, Entity Framework Core
Architecture	Clean Architecture, SOLID, Design Patterns, Microservices, Turborepo, Monorepos
Testing	JUnit, xUnit, TDD, Unit Testing, in-memory fakes
DevOps	Git, GitHub Actions, Docker, Vercel, CI/CD, Electron, Capacitor (Android/iOS), Core Web Vitals
Methodologies	Scrum, Agile, AI-Assisted Development (Claude Code, Antigravity), Technical SEO, Code Review
Spoken Languages	Spanish (native) · English B2/C1 · Portuguese (basic)

FEATURED PROJECTS

- Enterprise Inventory Hub

Angular · Node.js · TypeScript · PostgreSQL · REST API · JWT · RBAC

Full stack platform with Angular component architecture, role-based access control (RBAC), scalable REST APIs and JUnit unit testing. Collaborative development under Scrum.
- Distributed Trivia Engine

Java · Spring Framework 4+ · Spring MVC · WebSockets · Hibernate · MySQL

Real-time multiplayer system with Java Spring Framework, WebSocket concurrency management, user authentication and game state persistence with Hibernate.
- AI Semantic Engine

.NET 9 · C# · NLP · Entity Framework Core · Clean Architecture · xUnit

Automated assessment with natural language processing under Clean Architecture, xUnit unit testing and automated PDF report generation.
- Full portfolio: <https://dev.giulianadirocco.com>

EXPERIENCE

- Full Stack Developer

Freelance

December 2025 – Present

- End-to-end development with React, TypeScript and Node.js: e-commerce platforms and web systems from architecture to production deployment with Vercel and CI/CD.
 - REST API integration, payment gateways and reusable frontend components; performance optimization achieving 30% reduction in load times.
 - GitFlow, GitHub Actions, Scrum and REST API documentation across multi-module projects with systematic code reviews.
- Technical Tutor — Web Development

Private / UNLaM

August 2024 – Present

- Designed learning roadmaps in algorithms, data structures, JavaScript, React and SQL for undergraduate university students.
 - Code reviews with detailed feedback on Clean Code, Git and relational database design. Clear technical communication applicable to multidisciplinary team environments.

EDUCATION

- Web Development Degree

Universidad Nacional de La Matanza (UNLaM) · Argentina · 18 of 20 subjects passed with distinction · GPA 8.72 / 10

March 2024 – Present

Graduating: July 2026

Key subjects: Algorithms & Data Structures · OOP · Relational Databases · Software Engineering · Computer Networks
