PROFESSIONAL SUMMARY

Full stack developer and co-founder of CosteAR, a costing platform for SMEs and Emprene U 2026 semifinalist. I work with React, Node.js and TypeScript, from the data model to deployment, and build custom CRMs for freelance clients. I own the costing domain within an AI-agent development workflow (issues → Codex agents → CI evaluation gate). Associate Degree in Web Development (UNLaM), currently pursuing a B.S. in AI.

TECHNICAL SKILLS

- **Frontend:** React 18/19, Next.js, TypeScript, JavaScript, Angular, TanStack Router/Query, Zustand, Tailwind CSS, Three.js, Vite
- **Backend:** Node.js, Fastify, NestJS, Java 21 with Spring Boot, C# with .NET 9, REST APIs, Clean Architecture
- **Data:** PostgreSQL, Prisma, Supabase, Redis, BullMQ, MySQL, SQL Server, multi-tenancy with RLS
- **AI:** RAG (Voyage AI, pgvector, hybrid search, reranking), Gemini API, Groq
- **Infra & quality:** Git, GitHub Actions, Docker, Vercel, Railway, Sentry, Vitest, JUnit, xUnit
- **Security:** JWT RS256 with refresh tokens, Argon2id, RBAC, row-level security
- **Ways of working:** Scrum, code review, agentic development workflow (Codex, Claude Code, Antigravity)
- **Languages:** Spanish (native), English B2 (upper intermediate)

EXPERIENCE

Co-founder & Full Stack Developer — CosteAR

2026 - Present

- Costing platform for SMEs that updates costs for inflation, exchange rate and wage agreements using BCRA and INDEC data. Emprene U 2026 semifinalist. In production with its first client.
- Owner of the costing domain: review and approve changes to the calculation engine (decimal.js, variable costing, break-even, idle capacity).
- Built the RAG-powered advisor: hybrid search in pgvector with Voyage AI reranking, per-answer citations and an evaluation set that runs in CI as a merge gate.
- Backend in Node.js 22, Fastify, Prisma and multi-tenant PostgreSQL with RLS. Queues with Redis and BullMQ, 2,000+ automated tests and CI/CD with GitHub Actions.

coste-ar.com

Full Stack Web Developer — Freelance

Dec 2025 - Present

- **Craft Studio:** a site with 3D built in Three.js and a custom CRM where the team assembles case studies from nine block types with live preview (React 19, Supabase, Cloudinary).
- **Fidalgo Select:** a car and real-estate marketplace with a custom CRM to publish listings, quote and manage leads, plus technical SEO with JSON-LD and a sitemap (React, Supabase, Leaflet).
- **MUDA:** a site and admin panel for a fashion studio where accepted applications publish themselves.
- Also built institutional sites for Emmedigital, Unik, La Quinta Miri and The Magical Duo.

Technical Mentor in Web Development — UNLaM

Aug 2024 - Mar 2026

- Study plans and code reviews in JavaScript, Java, React, Node.js and SQL, focused on clean code, Git and database design.

PROJECTS

NIDO — AI-Powered Home Management App (Capstone Project)

Angular · .NET 9 · C# · PostgreSQL · Clean Architecture · OCR · AI

- Capstone project with an 8-person team; worked full stack. Includes an AI recipe assistant, a cooking chat, OCR receipt scanning and price comparison.
